

¡Así son los suelos de mi nación! ®

Es el proyecto educativo de la Sociedad Latinoamericana de
la Ciencia del Suelo

Siendo nuestra prioridad el educar y concientizar a los niños
en edad escolar, a partir del 5 de diciembre de 2020 nos
sumamos al proyecto educativo de la International Union of
Soil Sciences (IUSS)

LA IUSS VA A LA ESCUELA ®

¡Thus are the soils of my nation! ®

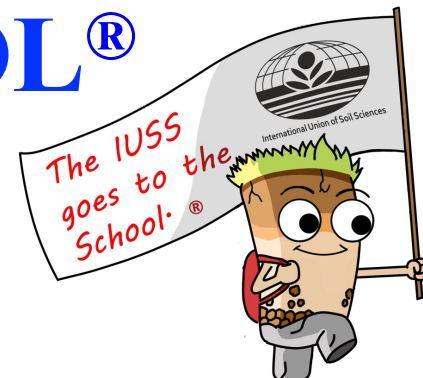

It is the educational project of the Latin American Soil
Science Society

Been our priority is to educate and raise awareness among
school-aged children, starting December 5, 2020, we joined
the educational project of the International Union of Soil
Sciences. (IUSS)

PRESIDENTS WORKING With IUSS GOES TO THE SCHOOL

IUSS invites our entire community to celebrate our 98th anniversary <https://>

WELCOME

This space is designed especially for you!

**You are a very important person for the
International Union of Soil Sciences (IUSS)**

For the International Decade of Soils: 2015-2024, the IUSS has defined two principal goals: To stop land degradation on our planet, and to put the main focus of our activities on school-age children to achieve it.

Consequently, on **December 5, 2020**, in the frame of the celebration for **World Soil Day**, we launched the Project "THE IUSS GOES TO SCHOOL" to inform children and young people like you about the importance of the soil resource in our lives and the urgency to protect it.

The IUSS is creating this space for all children around the world and inviting them to take care of the Soils of their Nation and teach their parents and teachers to do so.

We hope you enjoy it!

Mr. Time and the Bug Gang

Soil is the place where plants, animals and people live. But it was not always like this...

Many, many years ago, more than we are used to counting, where today there is soil, before there was rock ... Yes! hard and solid rock ... but the rains, the cold, the heat and above all, Mr. Time, were consuming it.

The plants that grew on top and the animals also ended up wearing it down, until it formed a fluffy and humid mattress, where millions of very tiny almost invisible living beings live. That fluffy and humid mattress is THE SOIL!!!!

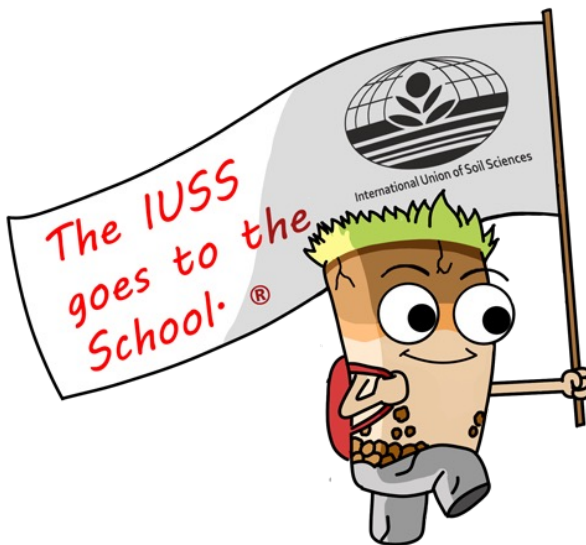

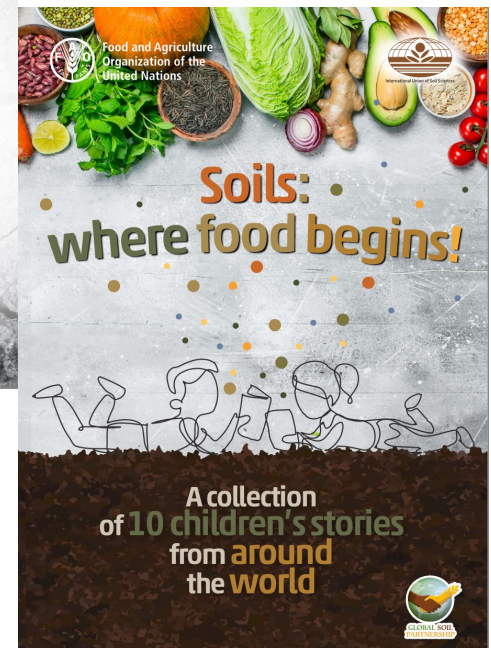

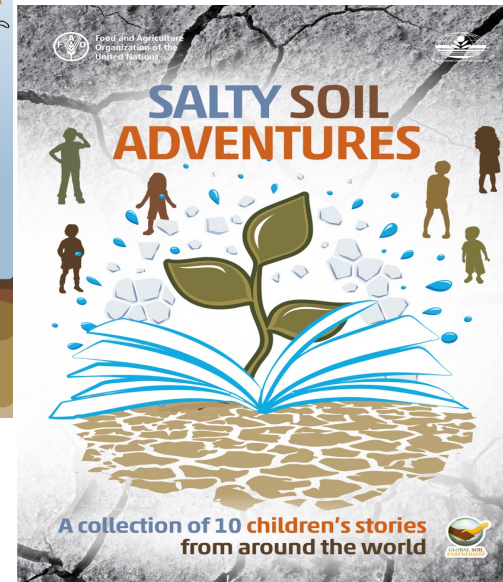

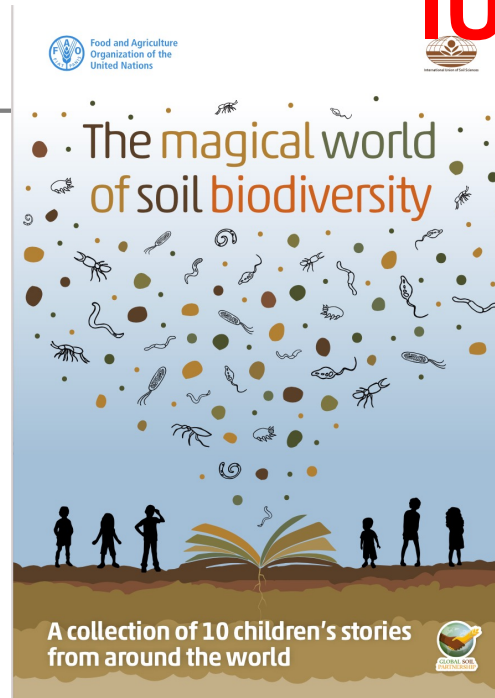

SOIL EROSION

"Stop Soil Erosion. Save our future!"
